ECE3700J FA22 Lab1 Demonstration Specification

*This file may be changed, so stay tuned on Announcements and Files in CANVAS.

1. The demo session is set with first come first served policy, you should sign up your demo sequence as a list in the shared file in the meeting (See the figure below). Once you fail to demo correctly, you should sign up again at the end of the list:)

2. Demo procedure (screen sharing based):

    1) You are invited to a breakout room of the meeting,

    2) Ripes pre-opened with your source code loaded in your computer,

    3) Run your source code,

    4) Show TA your result

3. You should submit your source file immediately you finish the demo (Your submission time will be recorded:). If the demo session extends due to some unexpected technical issue, you should also submit your source file before the deadline specified in CANVAS.

4. Source file submit format should be "YourName_StudentID_lab1.s"

5. Several questions about your coding logic will be asked after your demo is done

6. Your source code will be checked for plagiarism and re-run to check the correctness again
